

Landscape lighting solution

Reinventing light culture with technology and design

Unilumin believes that with the development of nightscape economy and urban landscape lighting, lighting technology should not only satisfy people's material enjoyment in function, but people's spiritual enjoyment in design. Therefore, Unilumin merged companies that engaged in landscape design with the purpose of creating a group that provides lighting products rich in culture, science and technology. Unilumin integrates professional and experienced elites to build targeted project teams and work out designs that combine art, technology and culture. Unilumin aims to provide customers with one-stop solution including advising, consultation, planning, design, investment, construction and operation of urban lighting, planning and design of cultural tourism lighting as well as implementation and operation of tourism lighting and lighting system solutions.
